Period $\square$ Date $\qquad$

1. Given $\triangle \mathrm{ABC} \sim \triangle \mathrm{DEF}$ and the altitude and median for $\triangle \mathrm{DEF}$ at F are given, draw the altitude and median at C (appropriately adding any markings needed) and find their lengths.

2. Given $\triangle \mathrm{ABC} \sim \triangle \mathrm{ADE}, \mathrm{AC}=20$ and $\mathrm{BF}=5, \mathrm{AD}=\frac{1}{4} \mathrm{AB}$, find the area of $\triangle \mathrm{ADE}$.
